Dataset Information

- Data contains the live stock value of 3 major companies. Microsoft, Apple and Tesla.
- S&P500 is presented as well
- Stock value was tracked live from 2018-2023 daily by Yahoo finance
- Values and percentage change is shown
- SP_500 is a stock market index used to track 500 companies stock performance in the United States
- Capital Asset Pricing model uses the slope coefficient β as a regression model for a measure of relative risk
- Calculated by excess return on stock(ex.app%chng) vs stock return on the market(S&P%chng)

Problem Statement

Stock play a significant role in the world of finance and investment. Deciding on which stocks to invest in can completely alter a person's life. They are critical to the financial well being of individuals and communities. Yet it is hard to determine how stocks will change after time.

Investment Decision-Making: stock reports provide crucial information and analysis that investors use to make informed investment decisions. They offer insights into the financial health, performance, and outlook of a company, helping investors assess whether a particular stock is a suitable addition to their portfolio.

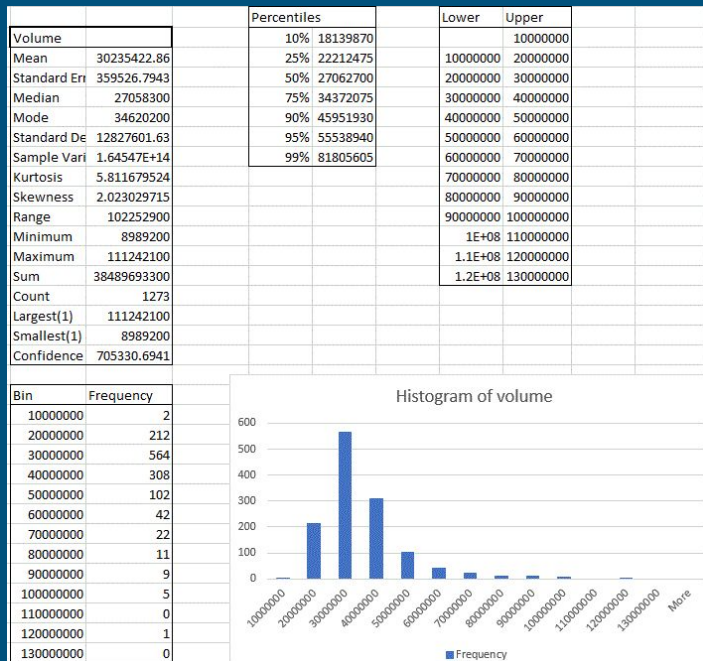

Risk Assessment: Stock reports help investors evaluate the risk associated with a particular investment. They provide information about a company's financial stability, debt levels, and exposure to market risks, allowing investors to gauge the potential downside of an investment.

Performance Evaluation: Stock reports offer a historical and current performance analysis of a company's stock. Investors can assess how a stock has performed over time and compare it to benchmarks or industry peers to gauge its relative strength or weakness.

Microsoft

Microsoft

- Descriptive data for amount of shares sold
- The histogram is left-skewed indicating higher amounts of stocks were sold less often
- Mean is 30235422.86 with a high range
- Minimum is 8989200
- Maximum is 111142100

- Scatter plot indicates there is no correlation between microsoft change against volume
- Shown in the graph on the right, the second quarter shows the most growth

Line graph for Series of Sum of High stock value vs Sum of low are very similar in value. Indicating Microsoft does not fluctuate much

Tesla stock analysis

TESLA

Descriptive data

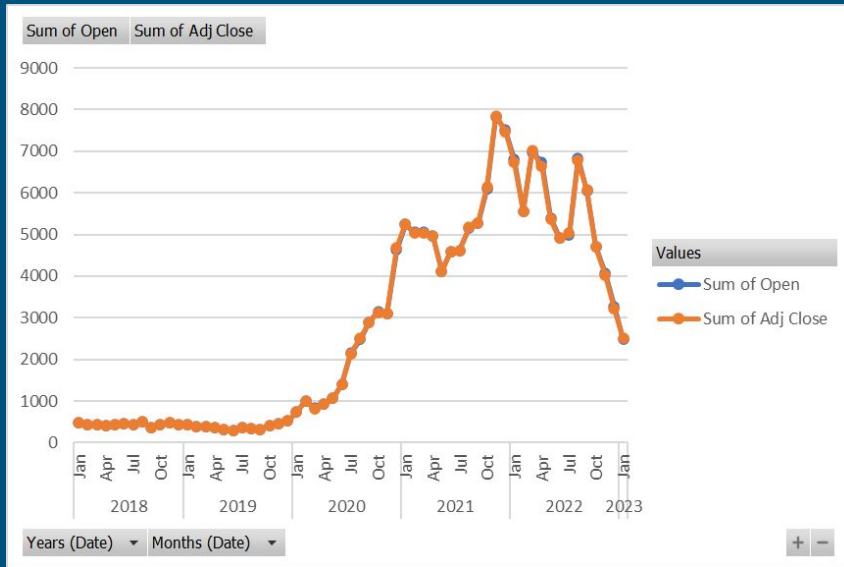

- The histogram is left-skewed indicating higher amounts of stocks were sold less often
- Mean is 1.33 E+08 with a high range
- Minimum is 29401800
- Maximum value is 9.14 E+08

- Scatter plot indicates as Tesla volume increases, so does Tesla % changes
- Shown in the graph on the right, the third quarter shows the most growth

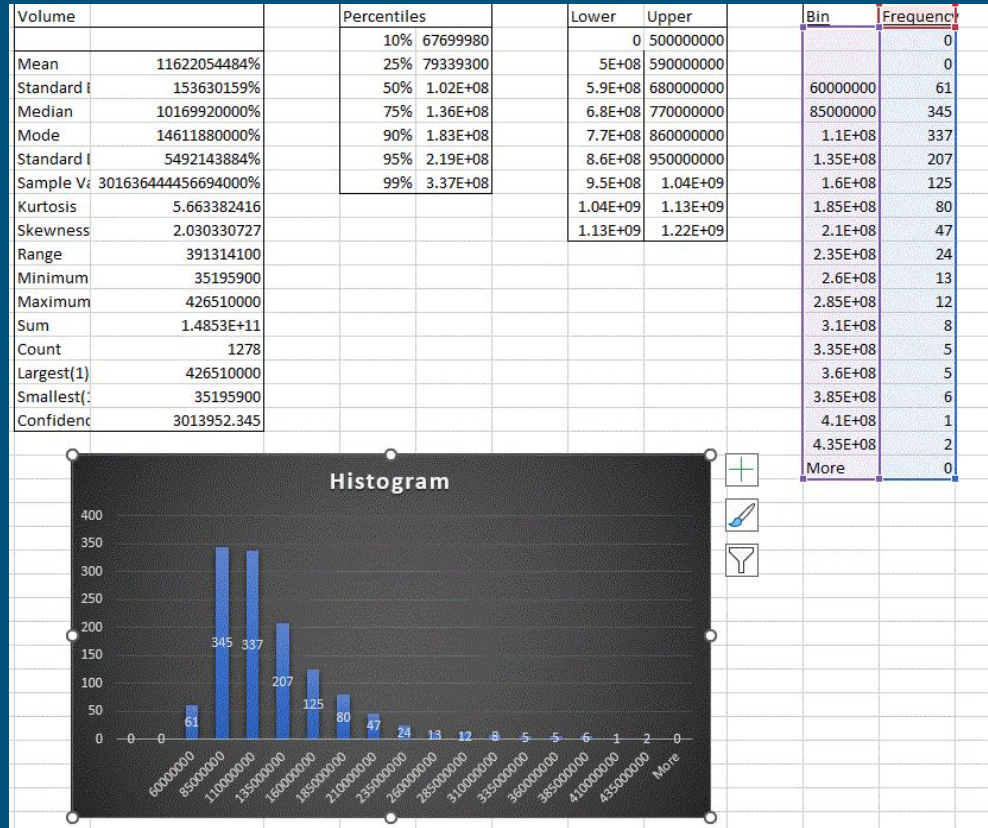

Line graph for Series of Sum of High stock value vs Sum of low are very similar in value. Indicating Tesla does not fluctuate much. Compared to Microsoft, the difference is larger. Sum of open and adjusted close are also similar

Apple stock analysis

Descriptive analysis

- The histogram is left-skewed indicating higher amounts of stocks were sold less often
- Mean is 1.16×10^9
- Minimum is 35195900
- Maximum value is 4265100000

- Scatter plot indicates as Apple volume increases, so does Apple % changes
- Shown in the graph on the right, the third quarter shows the most growth

Line graph for Series of Sum of High stock value vs Sum of low are very similar in value. Indicating apple does not change
Sum of open and adjusted close are also similar

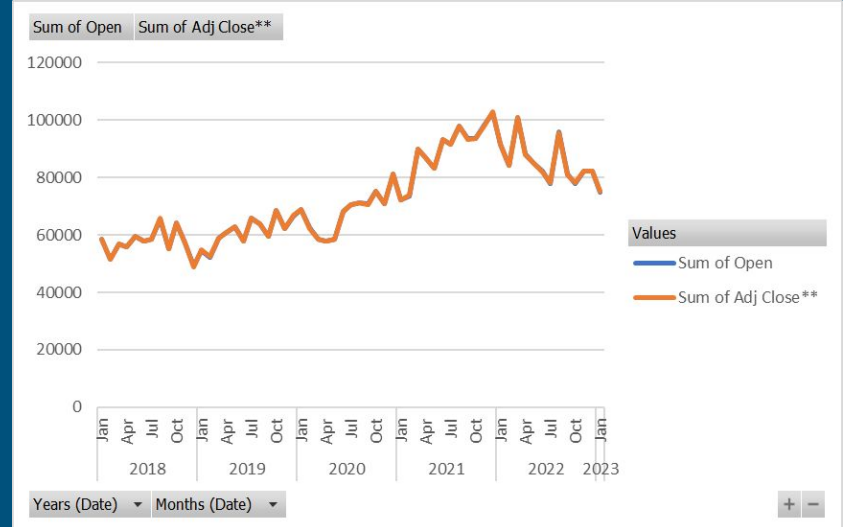

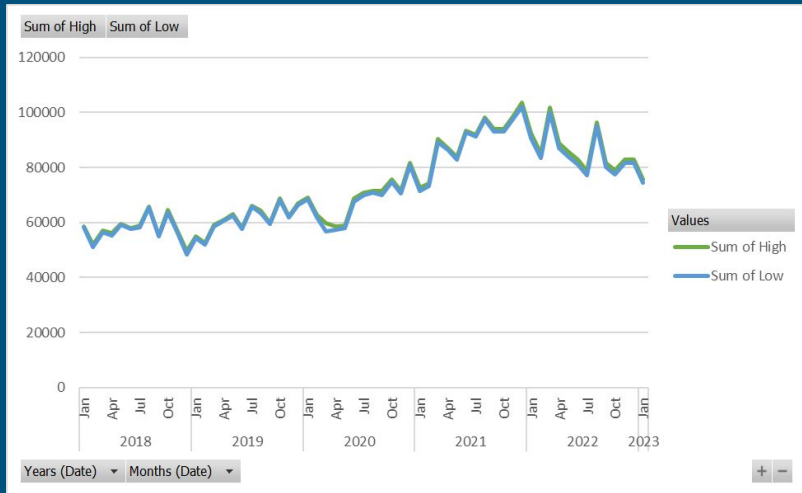

- The histogram is left-skewed indicating higher amounts of stocks were sold less often
- Mean is 4227470023
- Minimum is 1295630000
- Maximum value is 9976520000

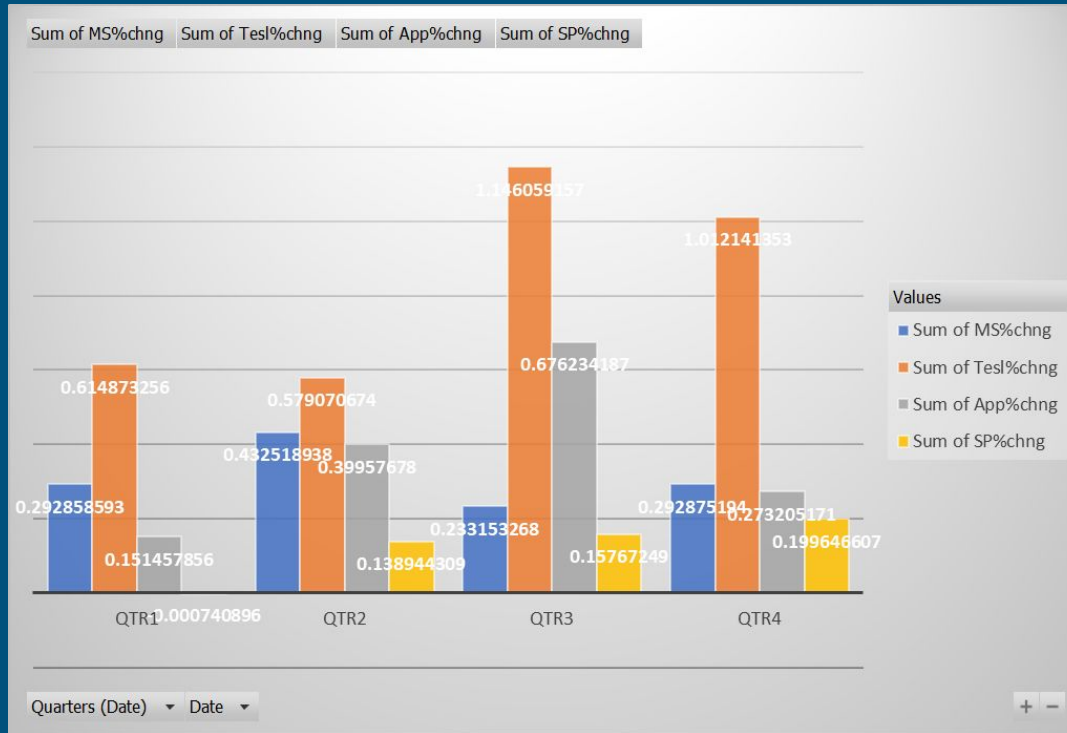

- Scatter plot indicates there as volume increases, so does SP%Chng
- Shown in the graph on the right, the 4th quarter shows the most growth

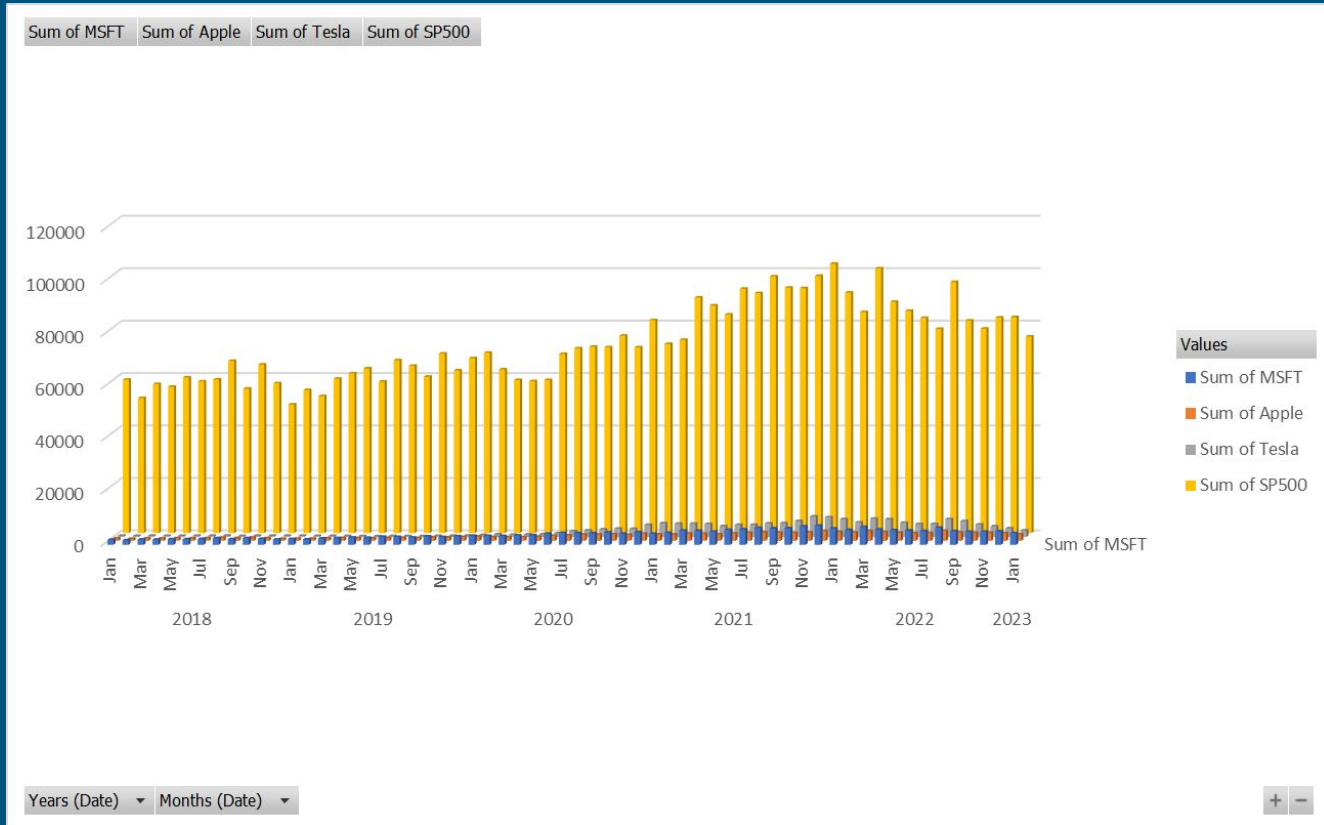

Line graph for Series of Sum of High stock value vs Sum of low are very similar in value. Indicating Tesla does not fluctuate much. Compared to Microsoft, the difference is larger. Sum of open and adjusted close are also similar

Comparing companies

- It is shown that Tesla has the highest amount of changes and growth
- In contrast, SP_500 has the lowest amount of changes

- It is shown that SP_500 stocks sell much more than the rest of the stocks
- Apple has the lowest amount of monthly stock sells and purchases

- When split into quarters, it is shown that SP500 has the largest amount of percentage change

Relative Risk Analysis

Figure shows an R^2 value of 0.0016, a low beta coefficient. Showing that microsoft has low risk and low return

Sum of Tesl%chng vs Sum of SP_500 change

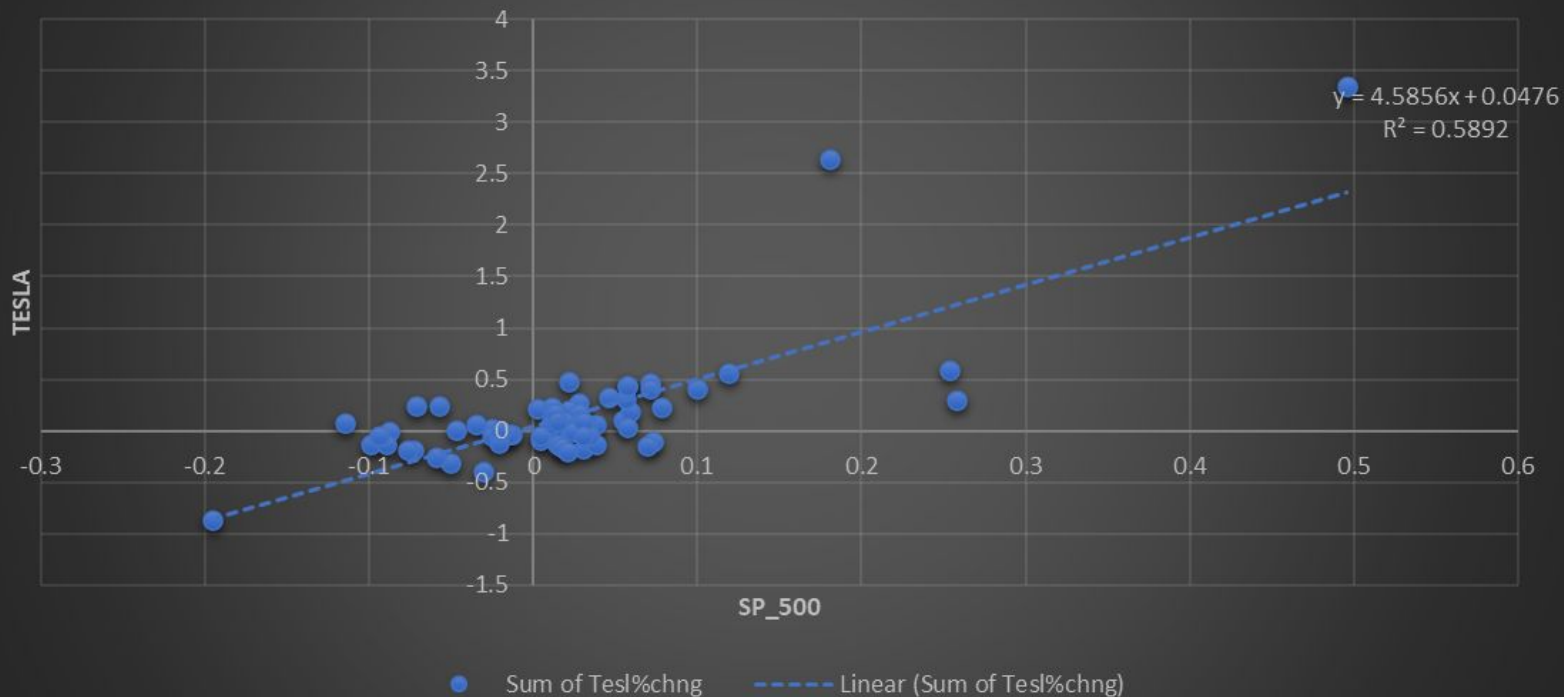

Figure shows an R^2 value of 0.5892, a somewhat high beta coefficient. Showing that Tesla has a medium risk and reward

MONTHLY APP%CHNG VS SP_500%CHNG

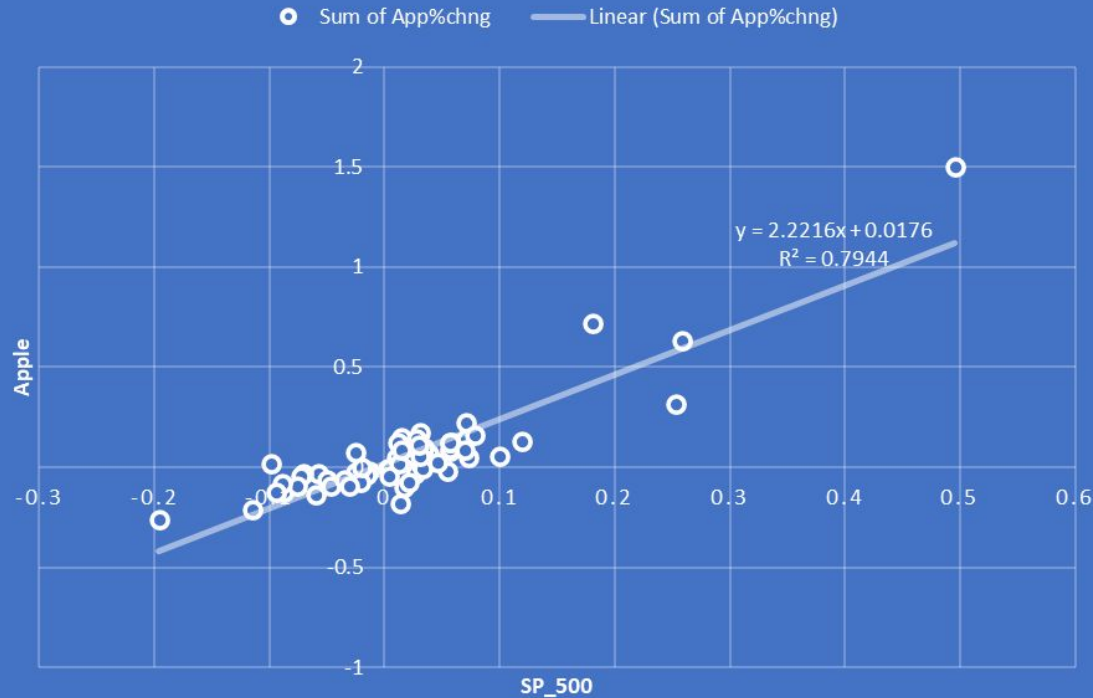

Figure shows an R^2 value of 0.7944, a high beta coefficient. Showing that apple stocks have a high risk and as such, a high return.

Conclusion

This comprehensive stock report has provided a detailed analysis of Microsoft, Tesla, and Apple from the years 2018 to 2023. Our objective was to gain insights into the performance, risks, and investment potential of these prominent companies within the ever-evolving financial landscape.

This report serves as a valuable resource for investors, financial analysts, and stakeholders seeking to make informed decisions in the dynamic world of finance and investment. It is essential to remember that while historical data and analysis offer valuable insights, the financial markets are subject to change, and past performance does not guarantee future results.
